### About the Department

The Department is bestowed with an experienced team of faculty. Excellent infrastructure, state-of-the-art computers with the latest advances in technology and comprehensive study material make the Department a class apart. The Department encourages interaction with experts from the industry and academic. Seminars, industrial visits, technical quiz, paper presentation contest are some of the activities that give students feel of the real world. The post graduates have found remarkable placements in companies and many are pursuing their higher studies from premier institutes in India and abroad

### Career Prospects

It encompasses a wide range of activities like Software development & engineering, Consulting, Solution Providing, Support & Services including system integration, Networking, Office Automation, Telecommunication and Computing, and mobile computing & several IT enabled services; therefore provide a larger area of job avenues for those who have acquired the right qualifications and necessary training for it.

The revised NASSCOM (National Association of Software and Services Companies) estimates that India would require 10,00,000 trained software professionals in next few years. The present availability of such skilled people is only 35% of the required amount & quality. So we can conclude that this sector is going to provide employment to a large number of such professionals in near future.
